South Central College

AGRI 1810  Intro to Sustainable Microfarming

Course Information

Description
This class is designed for individuals to enter agribusiness careers related to the growing demand by customers to purchase food produced locally. These operations tend to produce, manage, and market agricultural commodities differently than traditional agriculture models but have a tremendous potential in the new consumer marketplace. Students will be involved in all aspects of operation for a small farm to fork business model.

Using a high tunnel as the form of production, this course will follow the growth process of vegetables on a local scale. Students will look at the ability to farm on a small scale, focusing on locally grown crops. They will evaluate the market for and ability to maintain production practices within a microfarming practice. (Prerequisite: None).

Total Credits 1
Total Hours 16

 Types of Instruction

Instruction Type  Credits/Hours
Lecture  1/16

Pre/Corequisites
None.

Course Competencies

1. Explore the markets for locally grown vegetables.
   
   Learning Objectives
   Define community supported agriculture.
   Explore Farmer’s market options.
   Identify opportunities for direct markets.

2. Analyze critically how agribusiness technologies and current events will impact the agribusiness industry.
   
   Learning Objectives
   Demonstrate the construction of a high tunnel.
   Identify ways to utilize space inside the high tunnel.
   Explore benefits and negatives of high tunnels.

3. Analyze vegetable crop production.
   
   Learning Objectives
   Explore vegetable types and varieties that are typically used.
   Evaluate placing of crops, rotations and amounts that can be used.
   Explore diseases, growing issues and animals that will have a negative effect on production.
4. **Evaluate the business plan of a microfarming enterprise.**

   Learning Objectives
   Evaluate the business plan of a microfarming enterprise.
   Evaluate the inputs of a small scale vegetable production.
   Explore the income that can be realized in a microfarming enterprise.

5. **Explore the food safety associated with producing a food source.**

   Learning Objectives
   Identify food safety factors that are associated with raw food production.
   Demonstrate food safety practices when harvesting and prepping vegetables.

**SCC Accessibility Statement**

South Central College strives to make all learning experiences as accessible as possible. If you have a disability and need accommodations for access to this class, contact the Academic Support Center to request and discuss accommodations. North Mankato: Room B-132, (507) 389-7222; Faribault: Room A-116, (507) 332-5847.
