South Central College

MEAG 1500  Facility Maintenance

Course Outcome Summary

Course Information

Description  
This course covers farm and residential electrical wiring. Practical 120/240 volt circuit wiring, electrical safety, device selection, installation methods, grounding, bonding and service entrance panels included. Students will be wiring circuits according to code. Plumbing processes of Polyvinyl Chloride (PVC) and copper will be included. Another component of this class includes; OxyAcetylene welding, gas torch and/or plasma cutting and several forms of Arc welding. Students will spend time in the welding lab completing the required welds. Electrical and welding safety will be stressed. (Prerequisites: None).

Total Credits  3
Total Hours  80

Pre/Corequisites

None.

Institutional Core Competencies

Critical and Creative Thinking - Students will be able to demonstrate purposeful thinking with the goal of using a creative process for developing and building upon ideas and/or the goal of using a critical process for the analyzing and evaluating of ideas.

Course Competencies

1. Practice shop safety rules
   Learning Objectives
   a. Practice welding safety rules
   b. Practice electrical safety rules
   c. Practice plumbing safety rules

2. Read and interpret electrical wiring plans
   Learning Objectives
   a. Locate and mark wiring routes
b. Identify and ground electrical system

3. **Install 120/240 volt circuits**

   Learning Objectives
   a. Install switch and outlet boxes
   b. Connect receptacles, switches and fixtures
   c. Install a ground fault circuit interrupter

4. **Estimate wiring costs**

   Learning Objectives
   a. Determine the type and size of service entrance equipment
   b. Create a Bill of materials for Wire, Boxes, Fixtures, and other required materials

5. **Choose arc welding setting**

   Learning Objectives
   a. Select the proper arc welding electrodes
   b. Select the proper welding machine settings

6. **Explain oxyacetylene equipment setup procedures**

   Learning Objectives
   a. Describe oxyacetylene flames
   b. Select proper oxyacetylene welding and cutting tips

7. **Perform various welding operations**

   Learning Objectives
   a. Demonstrate various types of oxyacetylene welding beads and cutting
   b. Demonstrate various types of stick welding beads and cutting
   c. Demonstrate various types of inert gas welding beads
   d. Demonstrate plasma cutting

8. **Solder elbows and tee to copper tubing**

   Learning Objectives
   a. Demonstrate proper soldering procedures
   b. Demonstrate flaring copper tubing

9. **Examine various plastic pipe applications**

   Learning Objectives
   a. Glue elbows and tee to plastic pipe
   b. Explain other types of plastic systems used in plumbing besides PVC

**SCC Accessibility Statement**

South Central College strives to make all learning experiences as accessible as possible. If you have a disability and need accommodations for access to this class, contact the Academic Support Center to request and discuss accommodations. North Mankato: Room B-132, (507) 389-7222; Faribault: Room A-116, (507) 332-5847.
