3601 29TH AVENUE N.E.
MINNEAPOLIS, MINNESOTA 55418

TO OUR CUSTOMERS

SUBJECT: COMPLIANCE WITH SECTION 1910.1200 OF TITLE 29 OF THE CODE OF FEDERAL REGULATIONS — HAZARD COMMUNICATION

Effective November 25, 1985, notification provisions of the Occupational Safety and Health Administration (OSHA) Standard for Hazard Communication went into effect. The materials contained in the products manufactured by our suppliers listed below may not, in themselves, be identified as hazardous substances. However, the purpose of this OSHA standard is to ensure that the hazards of all chemicals in the form of liquids; dust or fumes released through regular usage, or from sawing, welding, brazing, grinding, burning, etc., be evaluated in order to keep these hazards below the permissible exposure levels, and that the information concerning these hazards is transmitted to affected employers and employees. In order for us, at the Walter R. Hammond Co., to discharge our responsibility to inform our customers of potential hazards in the products sold by us, we have enclosed Material Safety Data Sheets (MSDS) for the following manufacturers we represent: It is recommended that copies of these enclosed Material Safety Data Sheets (MSDS) be posted or otherwise made available to your employees.

Cleveland Twist Drill Co.
The Weldon Tool Co.
Severance Tool Industries, Inc.
Marshall Steel Co.

Material Safety Data Sheets for other manufacturers we represent will be sent with the first shipment of a product ordered from us.

We realize you may or may not be the correct person in your organization to receive this information. However, these sheets contain information that is valuable to your health and safety programs and may be required to be in your possession by the Federal OSHA Standards or other Right-To-Know Legislation. If you are not the correct person to receive this information, please pass it on to your hazard communication coordinator, industrial hygiene, or safety personnel so they can communicate this information to those employees having contact with these products.

Best regards,

WALTER R. HAMMOND CO.
