Aerial Lift Operator Training

Effective Aerial Lift Operator Safety Training Tailored to Your Industry

This training prepares an individual to understand the hazards involved in improper or unsafe aerial lift operation. Course fulfills the classroom aerial lift training requirements for Scissors style and Boom style lifts used in general industry and construction. Hands on activities with your equipment can also be included in the training. Our qualified aerial lift trainers are knowledgeable in general industry and construction applications as well as applicable ANSI A92 standards.

This 2-hour course is designed to satisfy the general training requirements for aerial lift equipment operators. In addition to learning aerial lift safety principles, your trainer will review OSHA regulations and interpretations, and can provide on-site hands on training with your equipment.

Each equipment operator must be “Trained and Authorized” to operate these machines in the workplace. A certificate of completion will be issued to each operator that completes the course.
