

CARPENTRY

Certificate – 17 Credits

While physical dexterity and coordination are key elements to succeeding in this profession, carpentry also requires a keen mind. The Basic Carpentry Certificate introduces students to the skills needed to begin a career in the residential construction industry. The program coursework focuses on safety and tool usage, print reading, math used in construction, and the fundamental skills of residential carpentry.

NOTE: All program plans are preliminary & curriculum may change without notice. Your catalog of record may have different requirements.

Semester One (Fall) – 17 credits
