

South Central College

# HLTH 1000 Medical Terminology (Online)

## Common Course Outline

### Course Information

<b>Description</b>	This course teaches students to recognize and build medical terms after learning the meaning of word parts. The course is based on a systems approach. Students also learn how to interpret and use common medical abbreviations and symbols. With instructor approval, this course may be taken as independent study.

### Types of Instruction

#### Instruction Type

#### Credits/Hours

Lecture (Online)

### Pre/Corequisites

None required.

### Course Outcomes

#### 1. Demonstrate appropriate use of medical terminology components.

##### Learning Objectives

- Build medical terms.
- Spell medical terms.
- Pronounce medical terms correctly
- Define medical terms
- Analyze medical terms

#### 2. Identify the major structures for each of the body systems.

##### Learning Objectives

- Build medical terms related to the major structures of the body systems.
- Spell medical terms related to the major structures of the body systems.
- Pronounce medical terms related to the major structures of the body systems.
- Define medical terms related to the major structures of the body systems.
- Analyze medical terms related to the major structures of the body systems.

#### 3. Identify the major functions of each of the body systems.

##### Learning Objectives

- Build medical terms related to the major functions of each of the body systems.

Spell medical terms related to the major functions of each body system.  
Pronounce medical terms related to the major functions of each body system.  
Recognize medical terms associated with the major functions of each of the body systems.  
Define medical terms related to the major functions of the body systems.  
Analyze medical terms related to the major functions of the body systems.

**4. Identify the key medical terms and related word parts for each of the body systems.**

**Learning Objectives**

Build medical terms related to each of the body systems.  
Spell medical terms related to each of the body systems.  
Pronounce medical terms related to each of the body systems.  
Define medical terms related to each of the body systems.  
Analyze medical terms related to each of the body systems.  
Recognize word parts related to each of the body systems.  
Build medical terms related to each of the body systems using related word parts.

**5. Demonstrate basic usage of terms related to the pathology and treatment procedures for each of the body systems.**

**Learning Objectives**

Build medical terms related to the pathology and treatment for each of the body systems.  
Spell medical terms related to the pathology and treatment for each of the body systems.  
Pronounce medical terms related to the pathology and treatment for each of the body systems.  
Recognize medical terms related to the pathology and treatment for each of the body systems.  
Define medical terms related to the pathology and treatment for each of the body systems.

**6. Demonstrate basic usage of terms related to the diagnostic procedures for each of the body systems.**

**Learning Objectives**

Build medical terms related to the diagnostic procedures for each of the body systems.  
Spell medical terms related to the diagnostic procedures for each of the body systems.  
Pronounce medical terms related to the diagnostic procedures for each of the body systems.  
Recognize medical terms related to the diagnostic procedures for each of the body systems.  
Define medical terms related to the diagnostic procedures for each of the body systems.

**7. Demonstrate basic usage of terms related to the medical specialists for each of the body systems.**

**Learning Objectives**

Build medical terms related to the medical specialists for each of the body systems.  
Spell medical terms related to the medical specialists for each of the body systems.  
Pronounce the medical terms related to the medical specialists for each of the body systems.  
Recognize medical terms related to the medical specialists for each of the body systems.  
Define medical terms related to the medical specialists for each of the body systems.

**SCC Accessibility Statement**

Disability Services provides accommodations and other supports to students with permanent and temporary disabilities that affect their SCC experience. Disabilities may include mental health (anxiety, depression, PTSD), ADHD, learning disabilities, chronic health conditions (migraine, fibromyalgia), sensory disabilities, and temporary disabilities (broken arm, surgery). Common accommodations are extended test time, private room for testing, audiobooks, and sign language interpreter.
